IRISH DRAUGHT HORSE SOCIETY of NORTH AMERICA
HAIR COLLECTION for DNA ANALYSIS
(ONLY one horse per page submitted)

Procedures for collection and mailing of hair samples for DNA testing

Hair from the mane or tail must be freshly pulled so that the ROOT BULB remains attached to the hair shaft. It is the root bulb that contains the DNA and not the shaft. A minimum of 25 ROOT BULBS are required. After pulling, cut the hair shaft so that the hairs are no longer than 3 inches in length. Tape the hairs onto this DNA typing request form with clear plastic tape. DO NOT tape over the root bulbs. Fold the form with the attached hair samples so that the hair is on the inside of the form and mail to the IDHSNA office with \$55* (US funds) as soon as possible to:

IDHSNA
PO Box 446, Bunnlevel, NC 28323

** or, enclose copy of Credit Card receipt if you have paid the DNA fee online*
All DNA results become the property of the Irish Draught Horse Society of North America (IDHSNA)
